

Why Choose IceTech?

Why Choose IceTech?

- :: We acknowledge our customers' search for information on competitor's equipment and prices.
- :: You may indeed find low-priced equipment on the market. However, buying cheaply could mean that you end up buying expensively in both the short and the long term.
- :: Please check the following comparison on dry ice/compressed air consumption, service/maintenance and spare parts before you make your final decision:

Consumption of Dry Ice and Compressed Air

- :: IceTech equipment uses up to **60% less dry ice** than that of our competitors but you still obtain the same or even higher cleaning results.
- :: One machine working 2 hours/day could mean additional costs of up to **USD 10,360** p.a. on dry ice only.
- :: IceTech machines use **less compressed air**; in most cases you can apply the existing air supply.
- :: Purchase of a competitor's system may require further investments in additional air supply equipment.

Service/Maintenance

- :: IceTech Inc. offers a **24 hour hotline service / 7 days a week.** Actually it is our experience that **90%** of all problems are solved on the phone.
- :: Avoid expensive and time-consuming service contracts; our service CDs and the trouble shooter in our manual enable you to handle most of the repairs / part replacements that may occur.
- :: Spare parts are shipped from stock via courier within 24 hours provided that you place your order by 12.00 noon eastern time.

Spare Parts

ICETECH EQUIPMENT

Blasting gun, standard
Round nozzle, 7 mm
Feeding disc

COMPETITORS' EQUIPMENT

up to **149%** more expensive
up to **186%** more expensive
up to **94%** more expensive

Make the Right Decision:
